

Custom Programming - Testimonials

"WaudWare has been a computer consulting solution of DBG for more than three years. Every challenge we have offered has been met with outstanding service. They have a reputation for immediate response, exceptional computer knowledge and rapid closure. The ability to understand our needs with very little direction has been a godsend. WaudWare makes dealing with computer consultants a painless event."

James Proulx, DBG

"We had discussed having a web presence for quite some time, but were put off by the costs and debatable ROI. WaudWare helped us develop an effective website at a price that made sense for our present needs. Plus we know that they have the capability to take us to the next level of functionality when our business plan calls for it." **Larry Pope, Edward H. Pope Ltd.**

"Understanding my business needs is critical to a successful computer system for our industrial parts distribution business. Charles is able to recognize opportunities, analyze our needs, organize the resources and effectively mobilize a team to achieve goals. He works effectively with my managers and staff to produce quality results". **Wally Mullin, Peel Industrial Supplies**
